

ProductionOne

The Complete Solution for the Manufacturing Industry

Your Business with ProductionOne

As an entrepreneur in the manufacturing industry, you are exposed to a wide variety of challenges every day. With an increasing bill of materials, complexity and a wide variety of production resources such as machinery, tools and labor, your ability to guarantee precise customer delivery dates becomes a complex task.

To meet current and specific requirements of the manufacturing industry, ProductionOne extends the functional scope of the ERP system SAP Business One with industry-specific functionalities.

Use real-time tools and industry-standard overviews as well as comprehensive production control, inventory control, warehouse management, logistics, and much more to run your business efficiently and successfully. From order management to production planning or payment processing – with ProductionOne you can maximize your production output, reduce set-up times, and easily meet your customer requirements.

The Highlights of the Industry Solution

Real-time Transparency of Your Business Performance

For many manufacturers, knowing ones core business due to transparency throughout the value chain and processes is the first step towards improving profitability. Save time and costs by centrally administering all production steps in one application. Detailed and comprehensive reporting ensures constant transparency. With one click you can evaluate all areas. In addition, you always keep an eye on returns, unexpected expenses and different currencies.

- Central project management down to the detail level and graphical planning board
- Transparent project cockpit with access to all information, budget, comparison of planned /actual data, documents, activities such as purchasing, production, customer interaction and service
- Quality management and quality assurance
- Batch management and documentation

Accelerate your Production

With ProductionOne, you can automate complex and time-consuming processes such as entering bill of material data. Capture, allocate and compare actual and standard costs for all finished products. Determine your requirements based on forecasts and order data and use this information to determine future product requirements. Improve the efficiency of your production: Plan your orders and resources better, easier, and faster. The utilization rate increases. Processing times decrease. Deadlines are met.

- Production plans
- Material requirements planning
- Preliminary calculation
- Bill of material management (sales order, project, material bill of material, etc.)
- Variant management
- Capacity planning
- Production cost calculation
- Production post-calculation
- Customer order and project-related product development

Simple Stock Management and Mobile Logistics

ProductionOne provides you with reliable information on deliveries, stocks, and item locations at all times. Thanks to a user-friendly interface, you can manage even extensive data smoothly and easily. You can view your inventory values using standard costs, moving average, FIFO, and other methods. The solution allows you to check your stock and item availability in real-time, but also to manage standard and special prices. Track stock movements and keep track of where your goods are at all times.

- Mobile logistics processes
- Shipping / Inventory
- Warehouse disposition and picking
- Stock management and optimization
- Pallet and transport container management
- Print function for labels with barcodes

Revolutionize Sales and Customer Service

Turn more prospects into customers, increase customer satisfaction, and thus lay the foundation for a significant increase in sales. With ProductionOne, you can seamlessly track business opportunities and customer activities - from initial contact to contract conclusion and support. Control the entire sales process and customer relationship cycle more efficiently. Our solution gives you an integrated view of your prospects and customers, helps you better understand their needs, and enables you to meet them more accurately.

- Integrated CRM-System
- Flexible Price- and condition systems
- Sales planning and forecasts
- Fully automated billing management
- Framework agreement
- Campaign management
- Sales control
- Activity management

Connect Your Entire Company

A fully flexible solution tailored to your needs is particularly important for your smooth business operations. This is because companies in the manufacturing industry often require specific interfaces that are tailored to the processes. For example, by integrating your CAD and ERP systems, all important information for production is centrally collected in the ERP system and enables interdepartmental cooperation.

- CAD Connection
- PLM Connection
- Synchronisation with Microsoft Outlook

On-Premise

Would you prefer to implement ProductionOne directly at your site? We offer different variants that suit your requirements.

What our customers say about us

Short implementation times, high flexibility, and a reliable partner were the most important requirements for us before introducing a new ERP system. With COMP.net and SAP Business One, these requirements were met for us.

— Jürgen Stibitz, CEO

We have been using SAP Business One since the beginning of the year and our expectations have been completely fulfilled. Business One has an intuitive user interface that the employees quickly became comfortable with. The range of functions in the basic version is phenomenal and covers all our needs in the areas of purchasing, sales, warehouse, service, and production. Functions specific to our company were implemented by COMP.net quickly and at a very reasonable price. COMP.net is an excellent partner with very competent employees and very short response times for service requests.

— Heinrich Kiehm, CEO

Successful Control, Successful Growth

With over 25 years of experience, COMP.net GmbH advises small and medium-sized companies and communities on IT and SAP Business One solutions and supports them in their successful growth. Our consultants look back on numerous projects with well-known manufacturers and are familiar with the industry-specific requirements. On this basis, they implement your project quickly and reliably and show you individual development potentials.

We advise you individually and personally.
